

## LED Beacon «ZOM PPD»

JSC "Proton" offers LED beacons of low intensity. This beacon is equipped with specially designed light emitting diodes. It allows achieving an optimal beam pattern and luminous intensity, which meet the requirements of **IAC AR-170** and **ICAO**, and high reliability of the device. The device is designed for the light indication of high and extensive buildings, which can be dangerous for air traffic and for the earth objects marketing.

### Dimensions and physical configuration of ZOM PPD

ZOM PPD A	ZOM PPD B (A1)	ZOM PPD C
		
		

The temperature range: from - 50°C to 50°C;

Climatic performance: MCC 1;

The colour filter: clear, transparent ;

The emission colour: red and white;

The warranty period: 5 years;

Durability: not less than 12 years.
