

## LED Beacon «ZOM PPM»

JCS “Proton” offers LED Beacons of low intensity. Specially designed light emitting diodes are used in this beacon. It allows achieving the optimal emission diagram and luminous intensity, which meet the requirements of **IAC AP-170** and **ICAO**, and high reliability of the device. The device is designed for the light marking high and extensive buildings, which are used for the air traffic security and for constant luminescence on the ground objects as a signal light.

### Dimensions and physical configuration of ZOM PPM

ZOM PPM A2	ZOM PPM B (A1)	ZOM PPM C
		
		

The temperature range: from - 50°C to 50°C;

The climatic performance: MCC 1;

The colour filter: clear, transparent ;  
 The emission colour: red and white;

The warranty period: 5 years;

Durability: not less than 12 years.
